OBJECTIVE

Final-year ECE undergraduate with hands-on experience across computer vision, reinforcement learning, and LLM-based agent systems, gained through university HPC infrastructure, hackathons, and an industry accelerator program. Comfortable taking a project from GPU-based model training through to a working, deployed system.

Education

B.Tech, Electronics and Communication Engineering (VLSI Specialization), KL Deemed University, Hyderabad Expected May 2027
CGPA: 8.29/10

Diploma, Electronics and Communication Engineering, Anurag Engineering College, Telangana 2024
CGPA: 9.18/10

SKILLS

Languages	Python, Java, C++
ML / AI	PyTorch, YOLOv8, Computer Vision, Reinforcement Learning, LLM Agents & Orchestration, Temporal Graph Convolutional Networks
Infra & Tools	Docker, Kubernetes, eBPF, FastAPI, Linux (Fedora), Git

PROJECTS

- Smart Urban Traffic Density Analyzer.** Trained a YOLOv8 detection model on the university's multi-GPU HPC cluster, then built a real-time inference pipeline for vehicle detection and traffic density estimation using multi-threaded video processing. Ranked Top 3 among 200+ teams at IISc Bangalore Urban Vision Hackathon 2024. (GitHub)
- ChipCycle – RL Environment for ASIC Sign-off.** Built a reinforcement learning environment that models ASIC sign-off decisions as a sequential decision-making problem, letting an agent learn design-closure strategies instead of following fixed heuristics. Built for the Meta PyTorch OpenEnv Hackathon x Scaler. (GitHub)
- Koalent – Kubernetes Observability Platform.** Built an anomaly detection and root-cause analysis engine for microservices, combining Temporal Graph Convolutional Networks (TGCN), a Granger Causality Engine, and eBPF-based kernel-level tracing. Presented the platform to ABB engineering leadership in Bangalore as part of the ABB Accelerator Program. (GitHub)

Extra-Curricular Activities

- Top 3 – IISc Bangalore Urban Vision Hackathon 2024, among 200+ teams.
- Top 3 – VR Siddhartha Engineering College Hackathon 2023.

Leadership

- Vice President**, Aparmaya Club, KL University Jan 2024 – Present
Led 30+ student engineers across AI, autonomous systems, and embedded projects, and set up code-review workflows for the team.
- Treasurer**, IEEE ComSoc Student Chapter, KL University Jan 2025 – Present
Managed chapter finances and organized workshops on VLSI, signal processing, and communication systems.
