OBJECTIVE

Final-year ECE undergraduate who has trained and run inference for computer vision models on the university's multi-GPU HPC cluster, and built ML infrastructure on Kubernetes. Looking for an entry-level Cloud/MLOps role working on large-scale GPU clusters, focused on model deployment and inference performance.

EDUCATION

B.Tech, Electronics and Communication Engineering (VLSI Specialization), KL Deemed University, Hyderabad
Expected May 2027
CGPA: 8.29/10

Diploma, Electronics and Communication Engineering, Anurag Engineering College, Telangana 2024
CGPA: 9.18/10

SKILLS

Languages	Python, Java, C++
ML / Inference	PyTorch, YOLOv8, Computer Vision, Reinforcement Learning
Infra & Cloud	University HPC Cluster (multi-GPU model training), Docker, Kubernetes, eBPF, FastAPI, Linux (Fedora)
Other	Git, REST APIs, Telegram Bot/Webhook Integration

PROJECTS

Koalent — Kubernetes Observability Platform. Built an anomaly detection and root-cause analysis engine for microservices, combining Temporal Graph Convolutional Networks (TGCN), a Granger Causality Engine, and eBPF-based kernel-level tracing. Worked hands-on with Kubernetes deployment, container observability, and cluster-level monitoring; presented the platform to ABB engineering leadership in Bangalore. (ABB Accelerator Program)

OpenClaw — Multi-Agent LLM Pipeline. Built a Scout / Tailor / Pilot multi-agent LLM system that finds, tailors, and submits job applications on its own, served through a FastAPI backend with Telegram webhook control. Handled the whole stack myself, from LLM prompting and agent orchestration to API serving, running across two local machines (M1 Mac, Fedora Linux). (Personal Project)

Smart Urban Traffic Density Analyzer. Trained the YOLOv8 detection model on the university's multi-GPU HPC cluster, then built a real-time inference pipeline for vehicle detection and traffic density estimation using multi-threaded video processing. Ranked Top 3 among 200+ teams at IISc Bangalore Urban Vision Hackathon 2024.

LEADERSHIP & EXPERIENCE

Vice President Jan 2024 – Present
Aparmaya Club, KL University

- Led 30+ student engineers across AI, autonomous systems, and embedded projects, and set up code-review workflows for the team.

Treasurer Jan 2025 – Present
IEEE ComSoc Student Chapter, KL University

- Managed chapter finances and organized workshops on VLSI, signal processing, and communication systems.

ACHIEVEMENTS

- **Top 3** — IISc Bangalore Urban Vision Hackathon 2024, among 200+ teams.
- **Top 3** — VR Siddhartha Engineering College Hackathon 2023.
- Vice President of Aparmaya Club and Treasurer of IEEE ComSoc Student Chapter.
