SUMMARY

Enthusiastic and curious engineering student passionate about exploring and learning new technologies. An Electronics and Communication Engineering (VLSI) undergraduate with growing interests across multiple domains including hardware, software, and emerging research areas. Always eager to adapt, innovate, and contribute meaningfully to diverse projects and collaborative environments.

EDUCATION

2023 – 2027	B.Tech in Electronics and Communication Engineering (VLSI), KL Deemed University, Telangana, India; CGPA: 8.4/10
2021 – 2024	Diploma in Electronics and Communication Engineering, Anurag Engineering College, Telangana, India; CGPA: 9.18/10
2021	SSC (10th), ZPHS Konijerla, Telangana, India; CGPA: 10/10

PROJECTS

Smart Urban Traffic Reduction	Urban Vision Hackathon (3rd Prize)
Developed a real-time object detection system using YOLO v8l and ResNet.	
Optimized traffic signals in urban areas and deployed the model with Docker.	
Integrated sensor data for dynamic decision making.	
Improved traffic flow efficiency in simulation environments.	

Lane Keeping Car	VR Siddhartha Hackathon (3rd Prize)
Created an autonomous vehicle using OpenCV and Raspberry Pi 4.	
Enabled self-steering for safe navigation in test scenarios.	
Implemented lane detection algorithms for real-time adjustments.	
Tested performance in varied lighting and road conditions.	

Quantum Communication Simulator	Ongoing
Building a simulation tool to identify optimal ground station locations.	
Using QKD protocols to enhance satellite communication security.	
Analyzing environmental factors affecting signal strength.	
Aiming to contribute to next-generation secure communication networks.	

SKILLS

Programming Languages:	C, C++, Verilog HDL
AI & Computer Vision:	OpenCV, YOLO v8l, ResNet
Embedded Systems:	ESP32, Raspberry Pi 4, hardware-software integration
Containerization:	Docker
EDA Tools:	Cadence, LTSpice, Vivado, MATLAB, EasyEDA, Multisim
Others:	Quantum communication simulation, object detection models

AWARDS & ACHIEVEMENTS

2024	3rd Prize, Urban Vision Hackathon – Smart Urban Traffic Reduction (IISC Bangalore)
2023	3rd Prize, VR Siddhartha Hackathon – Lane Keeping Car Project (VR Sidhartha deemed to be university)

CERTIFICATIONS

2024	Cadence Spectre Level 1
2024	Embedded Systems and IoT Level 1

LEADERSHIP & ACTIVITIES

Vice President	Aparmaya Club – AI & Autonomous Systems Projects
Member	College Newsletter Team (ECE Branch)
Core Member	Broadcasting in ECE Student Body (PULSE)
